PO Box 6500
Canberra

Dear Sir,

Please accept these three matters as my submission for reform of Australian Government Administration.

1. Our Government must assert worldwide that the United Nations should organize a global examination of the causes of poverty on individuals. After total examination this must be followed by a visible plan to alleviate such suffering. Such would appear absolutely essential to a required effort to establish a viable global economy.
2. Our Government should legalise voluntary euthanasia or death with dignity throughout our land. This appears essential in any effort to correct certain defects that have developed in our outlook on religion.
3. All citizens should be invited to nominate fundamental matter on which to build a successful global economy.

Cover sheet enclosed.

Yours faithfully,

David Williamson.
